

Thermoplastic Valve Solutions

**Crop sprayers manufacturers quality partner:**  
our products will keep you SPRAYING !

## PRODUCTS AND SERVICES ADVANTAGES

**Reliable:** Proven design & a quality controlled manufacturing process

**Easy Installation:** Various threaded, flanged & plug-in type fittings

**Versatile:** Various seal and ball materials

**Robust:** GRPP; a corrosion & abrasion resistant material

**Servicable:** All products can be easily maintained to REDUCE LIFE TIME COSTS

**Safi,**  
Crop sprayers manufacturers quality partner:  
our products will keep you SPRAYING !

**SAFI has worked in partnership with crop sprayer manufacturers (OEM's) for 50 years.**

Our products are often used on crop sprayers dedicated for applications such as cotton, potatoes and beets as well as vine and citrus sprayers.

Our relationship with our customers comes from a solid foundation of supplying quality products to meet the needs of every application.

Our experience comes from supplying products into many quality driven and demanding market sectors as chemical, pharmaceutical, nuclear power generation and industrial mining.

SAFI has several manufacturing, sales and warehousing locations all over the world ; France, UK, Germany, Spain, Chile and USA. One of our key strengths is our ability to develop and manufacture bespoke products. Our strategic locations are very closed to our customers. As one of the first companies to serve the agricultural market with corrosion resistant plastic valves and actuators we have lead with innovation and quality.

As the market demands have changed from intensive to a more considered type of farming, SAFI has evolved in line with OEM's technology. As worldwide population continues to grow and new markets are realized, SAFI tries to keep ahead, developing products for the future.

We are very proud of the part we have played in the Agriculture market as we developed «flanged» and «plug and play» systems. The benefit of both systems is to reduce leaks and time during assembly. That is also why SAFI is also involved in sub-assembly manufacturers to reduce overall costs to OEM.

2 way and 3 way actuated ball valves type tested for 1.000's operations in corrosive and abrasive conditions.

**2-way and 3 way modular valves : supplied as single and multivalve (banks) of valves**  
**Modular advantages :**

- Compact design to reduce overall length in companies to standard actuated valves.
- Low power consumption 0.6 amps.
- Modularity/reversible actuator.
- Plug and play interface with OEM's equipment.
- Fast operating : 0.6 sec's for 90°.

**Options:**

- PP & S/Steel ball
- BSP, hose tail, camlocks and flanged fittings
- EPDM & FKM seals
- Customization ; bespoke handle design, customer logo/name on products, valves manipulation to meet specification,
- Coloured handles ; to identify valve specification and customer's preference.

**GRPP multipoint 3, 4 and 5 way manual and actuated ball valves.**

**Bulkhead fittings for storage tank applications.**

**GRPP 2 way manual ball valves threaded insert for valve support and different kind of o'seals.**
